

Next-generation data centers: simplify, unify, virtualize, and analyze

Improve productivity and enhance business processes

Got your mind on delivering applications? Your head in the cloud? Are you thinking about virtualization and the Internet of Things and your data center's need for speed and agility? Technology might be revolutionizing the data center, but it is challenging you, the IT professional, causing you to figure out ways in which to future-proof your operations.

With today's users on the move, running an assortment of applications, and demanding better BYOD experiences, new levels of innovation are required just to keep up. And keeping up is not enough.

That's where the GDTSM team comes in.

GDT has teams of architects and engineers with a breadth and depth of expertise across industry and in the multi-vendor architectures and services that combine to create the most innovative and imaginative data center platforms.

.....

Design **IT**. Build **IT**. Deliver **IT**.[®]

GDT is a Cisco Gold Partner with triple master certifications in Cloud Builder, Collaboration, and Security. GDT attracts top-of-their-field experts—across industry and with certifications in CCIE, CCIE Data Center, and CCDE, and other like-technologies—who work for us because they want to be a part of a company and culture that promotes creative excellence. GDT privileges their ideas and solutions as integral to the success of our company and yours.

What we will do for you

1.

We'll start by helping you assess demands on your current data center infrastructures, paying close attention, of course, to ways we might help you increase worker productivity and improve customer experiences.

2.

We'll help you get up to speed on new ideas or technologies involving IoT, Big Data and analysis as well as products and services that provide new ways to engage and interact with your users.

3.

We'll plan for the unification of your IT systems, tools and processes across both virtual and physical environments and discuss ways to adapt and extend your data center to create a hybrid cloud between private and public cloud providers.

4.

We'll design storage solutions around unified access, optimal performance and future growth and make recommendations for a virtualization solution based on your server, application, and network requirements.

5. We will deliver.

GDT delivers best-in-class end-user computing with the applications and infrastructures that serve users on the move and bringing their own devices:

- Converged infrastructures that come to you pre-tested, pre-validated and ready on delivery for your applications.
- Next generation server deployments that reduce the required infrastructure and drive down the total cost of ownership.
- ITaaS (IT as a Service) for your end user and your organization that increase productivity through orchestration.
- Scalable, flexible data center solutions and application-centric infrastructures that deliver the highest quality to your application.

**Virtualized infrastructure +
Rapid implementation =
Reduced system downtime**
less risk and greater return on investment

- Unified computing
- Storage architectures
- Virtualization & migration services
- Converged networking
- VDI
- Orchestration (VCAC, UCS Director, CIAC)
- Software defined

Where the Internet of Everything meets wireless

Agile, scalable, and purpose-built data centers meet current and future needs, while connecting operations, people and objects across physical and virtual boundaries and to the Internet. GDT designs data center solutions that allow your users access to information and lets you engage with and analyze user data to improve management, operations, and the overall user experience.

- Unified data center & storage
- Active/ active data centers
- ITaaS (IT as a Service)
- Mobile users
- IoT data gathering
- Data analysis

Navigating the new cloud ecosystem

Cloud services bring cost reduction and an array of technology solutions that simplify and streamline compute and storage resources, and a complexity of deployment. GDT's comprehensive Cloud Services—IaaS/PaaS/SaaS—are inclusive of design, migration, adoption and partner development. GDT simplifies integration, improves performance and refocuses IT as the strategic enabler of technology.

- IT as cloud service brokerage
- Migration & cloud adoption services
- Private cloud design & integration
- Consultation & advisory services

Backing IT organizations 24x7x365

GDT offers a comprehensive set of managed support services through our wholly-owned subsidiary GDT Advanced Solutions. With EDGE and INSITE—proprietary monitoring tools fueled by the highest level of Cisco Smart—and with state-of-the-art NOC support, GDT clients take comfort in knowing that expert engineers are watching out for their well-being.

- Change & problem management
- Availability monitoring
- Alert & incident management
- Vendor management
- Full service-desk support

GDT certifications and awards

Why GDT

Founded in 1996, GDT is an award-winning, technology integration partner. GDT specializes in designing, building, and delivering best-of-breed technology solutions for service providers, enterprise networks, data centers, and more.

GDT partners for innovation and accelerates business outcomes.

GDT aligns itself with rising technology stars and industry leaders such as . The GDT team of expert architects and engineers hold the highest level of certification and employ the use of state-of-the-art, LEED certified facilities to translate the latest ideas and technologies into inventive solutions that realize the goals of IT and the vision of business leaders.
