

# HYBRID CLOUD

Moving to the Cloud may sound like a simple solution at first, but when you pull back the layers, you'll soon discover just how complex it can be. The choices to make seem endless, and not fully understanding the ramifications of each can send your company down an inefficient and expensive path from which recovery will be costly.

This is where GDT's Cloud Practice professionals shine. They not only have deep insights into the various cloud services from AWS (Amazon Web Services), Microsoft Azure, Google Cloud and IBM Cloud, but have automation solutions to simplify deployment, migration and management for the most complicated of infrastructures.

## HYBRID CLOUD ROADMAP

Whether you're considering a total Cloud migration or building a hybrid solution by retaining some applications and services on-prem, GDT will design the perfect solution for your organization. GDT's assessment, procurement and migration processes turn customers' Cloud visions into a reality.

### ASSESSMENT

GDT conducts the following two initial assessments to help ensure future success:

- Migration Assessment
- Optimization Assessment

### MIGRATION

GDT's Cloud Services team utilizes assessments to construct new, or optimize customers' existing Cloud environments, and migrate necessary applications.

### PROCUREMENT

Even if you're an existing cloud customer, GDT can help by providing:

- Greater cost containment
- Additional security and compliance
- Resource utilization

## GDT'S CLOUD BUSINESS CONTINUITY PLANNING AND DISASTER RECOVERY (DR)

GDT's Cloud customers enjoy superior flexibility, whether a primary location or a disaster recovery site. GDT works with each customer to understand their current and future environment, and determines recovery options for each business unit's applications based on the RPO's and RTO's for each, including risk tolerance related to outages and associated costs. GDT automates the DR process with fully developed orchestration tools, and offers DR services on public, private and hybrid cloud solutions.

**GDT CLOUD MANAGED SERVICES PHASED APPROACH**

**GDT'S HYBRID CLOUD SERVICES**

GDT can manage your entire Cloud infrastructure, which includes monitoring performance, availability, and up-time, and provides alerts when anomalies are detected. The ability to provide preventative diagnosis is key to preventing complications that can cause extended downtime. When red-flag activities are detected, GDT promptly manages and reports on it.

The GDT Cloud team delivers quarterly reviews of your Cloud infrastructure, provides consultative services, and keeps a vigilant eye on clients' production environments by watching resource usage and monitoring traffic trends.

**WHY GDT?**

Founded in 1996, GDT is an award-winning, technology integration partner. GDT specializes in designing, building, and delivering best-of-breed technology solutions for service providers, enterprise networks, data centers, and more.
